Where we STARTED

A FUNNY STORY OF PROFESSIONAL DRY CLEANERS

We started in 2016 with a small shop. Back then there were not many professionals working in this field. There were some big brands, not because they had many outlets but they were quite costly. In 2017 after one year of experience we started a live studio with 65 % efficiency. It used to serve both laundry and dry cleaning with express service. Back then, it was a great achievement. It made us realise that there are so many problems in this industry. We pulled our socks up and started working. Who said that the first mover is an advantage, believe us first mover is a disadvantage. There were no trained labour, no software, no Sops, no Institute and yes, no one to guide. Caprodo got funding from Gemini Solutions and it was like a fuel in the rocket. We started solving problems one by one. Caprodo believes in Data and not on assumptions. Our data was promising and it gave us a green flag for the franchise. We started our 1st franchise in June 2018. We still work on Data rather than on assumption and this is a small secret of our success. And from June 2018 onwards our journey begins. It is well said that -
